Daily Coordination Meeting

General Topics:

- NEY- gate closes 29 December
- Weekend work

SE loading dock
Stair pad
2:00 am

This is an aerial photograph of an industrial or construction site. The image shows various structures, including large rectangular buildings with flat roofs, smaller utility buildings, and extensive parking lots filled with vehicles. In the background, several large cranes are visible against a dark sky. Three red callout boxes with white text and red arrows are overlaid on the image to highlight specific areas of interest. The first box on the left points to a location near a building. The second box in the center points to a specific area on a large building's roof. The third box on the right points to a location on the side of a building. The overall scene appears to be a busy industrial or construction environment.

Hit the Red Render it Dead

- Equipment that is not being actively moved, needs to be prevented from being accidentally moved.
- This is especially important for our MEWPs, as accidental movement can cause an employee to get pinched or struck by the obstacles around the equipment, or people on the ground can be hit by the equipment.
- Hit the red refers to the emergency stop button. If the equipment does not have one of these, the same effect can be achieved by turning the equipment off.
- This is not an optional program on this site, please talk about this with your crews. As more and more systems and obstructions are installed, we are at a greater risk of someone being injured if their equipment moves unintentionally.
